React Native Developer

Assessment Test

Descriptions

In this assignment, you will use React Native to write a screen based on the UI design on the following page of the test. The screen is a dental clinic's daily calendar, showing all appointments for one working day.

Requirements

- Mockup data for the test can be found as a "data.json" file attached to this email
- Any missing (or null) property of appointment object should be handled
- The whole calendar should be scrollable
- Each appointment card should be a touchable component (but no need to handle onPress)
- Using React Hooks or writing Class-based components is up to you
- You should write the component on your own, try not to use third party libraries

Brand Guidelines

- Font-family: Roboto, sans-serif
- Color code: #4AC0A4 (green), #70BDE9 (blue), #072D60 (dark blue), # FFC455 (yellow), #D62D68 (pink), #E8674D (orange) & #333333 (grey)
- Border-radius: 10px, margin: 10px, padding: 5px

Deliverables

- A zip file including source code (only .js files, not including node_modules)
- Or you may enter your source code in Github and send us the link
